Liceo De Bay

PROJECTS

AI-Powered Student Portfolio Platform

2023-01-01

React · FastAPI · Supabase

Built a full-stack student portfolio system using React, FastAPI, and Supabase, implementing user authentication and project submissions. Designed REST APIs and handled backend logic to generate feedback, scores, and learning paths through AI features.

Spynex

2023-01-01

React · FastAPI · Supabase

Designed and developed a full-stack e-commerce platform using React and FastAPI, with Supabase for authentication and data management. Focused on a responsive and secure interface while ensuring core e-commerce functionalities.

[React](#) · [FastAPI](#) · [MySQL](#)

Created a web-based platform guiding developers through structured learning paths using React for the frontend and FastAPI for the backend, with Supabase for data management.
